# Comparison between Trimble GIS Data Collectors

	Geo 7X	Juno 5	Nomad 5	TDC100	TDC150	TDC600
GNSS Accuracy	1-100 cm	1-4 m	2-4 m	1-2 m	1-100 cm	2-4 m
Operating System	WEHH 6.5	WEHH 6.5	Android 8.1	Android 6.0	Android 6.0	Android 8.0
Screen Size	10.7 cm / 4.2"	10.9 cm / 4.3"	12.7 cm / 5"	13.4 cm / 5.3"	13.4 cm / 5.3"	15.2 cm / 6"
Screen Type	Color touch	WVGA TFT	Color multi-touch	Color multi-touch	Color multi-touch	Color multi-touch
Used With	TerraFlex, TerraSync, Positions	TerraFlex, TerraSync, Positions	TerraFlex, Penmap for Android, Esri Collector	TerraFlex, Penmap for Android, Esri Collector	TerraFlex, Penmap for Android, Esri Collector	TerraFlex, Penmap for Android, Esri Collector
Satellites	GPS, GLONASS, Galileo, QZSS, BeiDou, SBAS	GPS, SBAS	GPS, GLONASS, BeiDou, SBAS	GPS, GLONASS, Galileo, QZSS, BeiDou, SBAS	GPS, GLONASS, Galileo, QZSS, BeiDou, SBAS	GPS, GLONASS, Galileo, QZSS, BeiDou, SBAS

# GNSS Receivers

- Catalyst
- R1
- EMPOWER EM100
- R2
- R4s
- R12
- R12i

# TDC600 Handheld Receiver

## Powerful

- 2.2 GHz Processor
- 4 GB RAM

## Android™ 11.0 operating system

- Support Google Mobile Services
  - Play Store, Google Maps, etc...

## Two-in-one

- Rugged smartphone
- Mapping grade (<1 m in optimal conditions)  
GNSS receiver

# Trimble Catalyst DA2 GNSS receiver

---

**Introducing a brand new engine at the  
heart of the Catalyst positioning service**

Simply Precise.

# Key Features

---

Catalyst

The Catalyst DA2

Devices, apps, and workflows

Updates to Catalyst subscriptions

Availability

## What is Catalyst?

**Trimble Catalyst is a revolutionary offering from Trimble that uses a software defined GNSS receiver technology.**

The solution enables a customer to subscribe to the Catalyst service in order to enable the GNSS receiver to operate at a level of accuracy related to their subscription level.

Catalyst consists of the DA2 receiver, a power bank of your choice, any Android or iOS device, and your application.

# What about “Corrections”?

Corrections are applied  
to raw GNSS data  
making positions  
accurate and reliable.

# What about “Corrections”?

Catalyst Subscriptions  
simply include  
Corrections

Android

Versatile

Lightweight

Catalyst  
Positioning

**iOS & Android**

**Bluetooth  
Delivery**

**Versatile**

**Lightweight**

**ProPoint  
Technology**

**Catalyst  
Positioning**

# Catalyst Technology

---

Trimble Catalyst is a revolutionary GNSS concept, simplifying the way that precise GNSS positioning is delivered

## ProPoint Technology

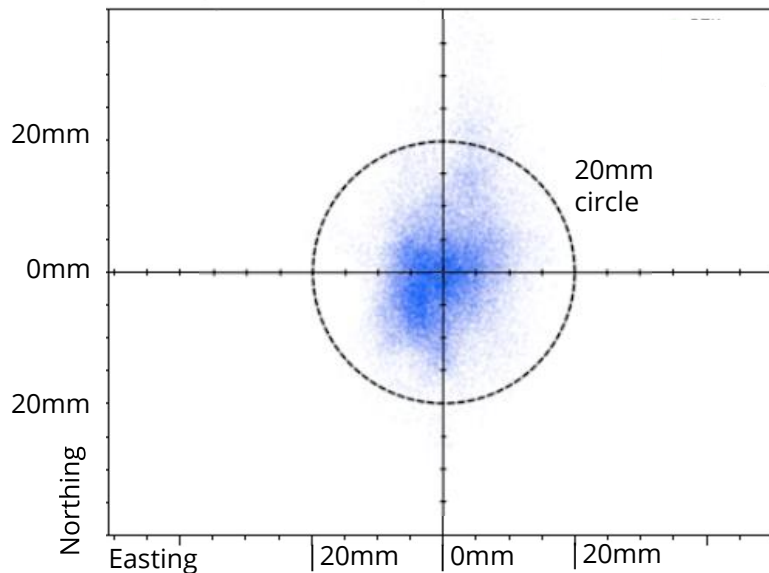

---

**Improved receiver performance in challenging\* GNSS environments, including operating under tree canopy or near buildings & other urban structures.**

\* Challenging GNSS environments are locations where the receiver has sufficient satellite availability to achieve minimum accuracy requirements, but where the signal may be partly obstructed by and/or reflected off of trees, buildings, and other objects. Actual results may vary based on user's geographic location and atmospheric activity, scintillation levels, GNSS constellation health and availability, and level of multipath and signal occlusion.

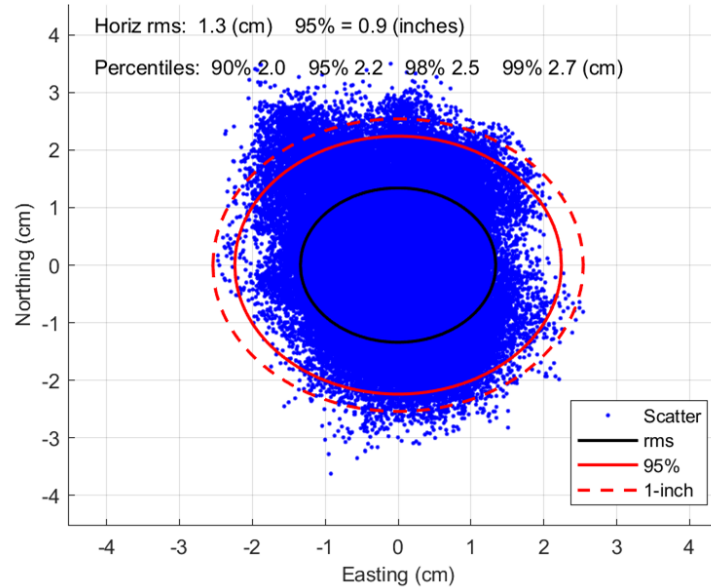

# DA2 Performance Testing: Accuracy RTK

RTK 27km, CMRx Horizontal Error  
Convergence time after RTK reset : < 5 sec (typical)

# DA2 Performance Testing: Accuracy RTX

## RTX accuracy

RTX Fast Convergence: 2 cm in 48 sec (68% percentile)

# Trimble DA2 Corrections Hub Coverage (DA2)

Catalyst subscribers can use Trimble RTX (L-band and IP) with their DA2 using the Trimble Corrections Hub (TCH).

# Configurations

Ways to use the DA2 receiver in field

## 2m Pole

## Monopole

## Backpack

# Application Software

## ■ Android 11 “Oreo”

### — Trimble Software

- Trimble TerraFlex™
- Trimble Penmap® for Android™

### — Third-party Software

- Location Services API
- Esri® Collector for ArcGIS®
- Android-based 3<sup>rd</sup> party apps

Full Selection of Attribute Types

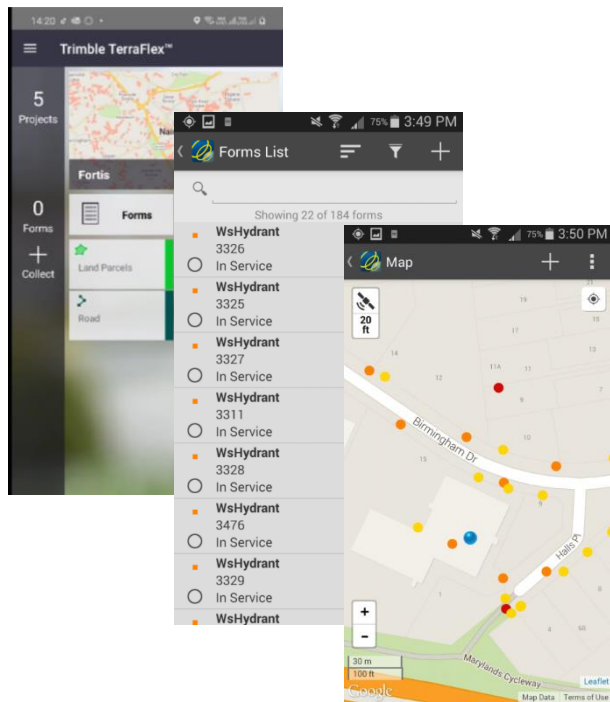

# Easy Position Display

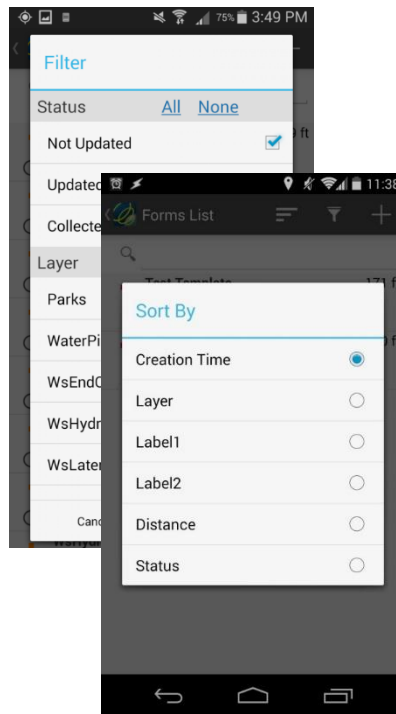

- Display your current location in the project coordinate system
- For Navigation, enter coordinates in Global, Local, or Projected

# Trimble TerraFlex Mobile

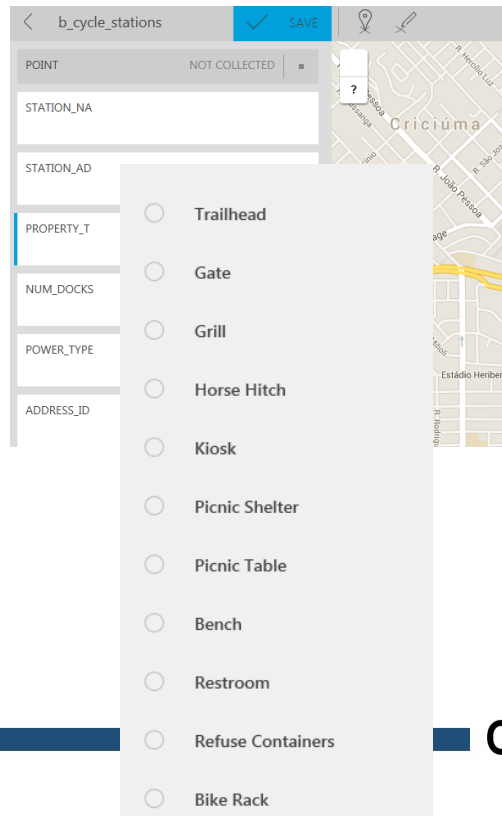

## Map View or List View

## Sort and Filter

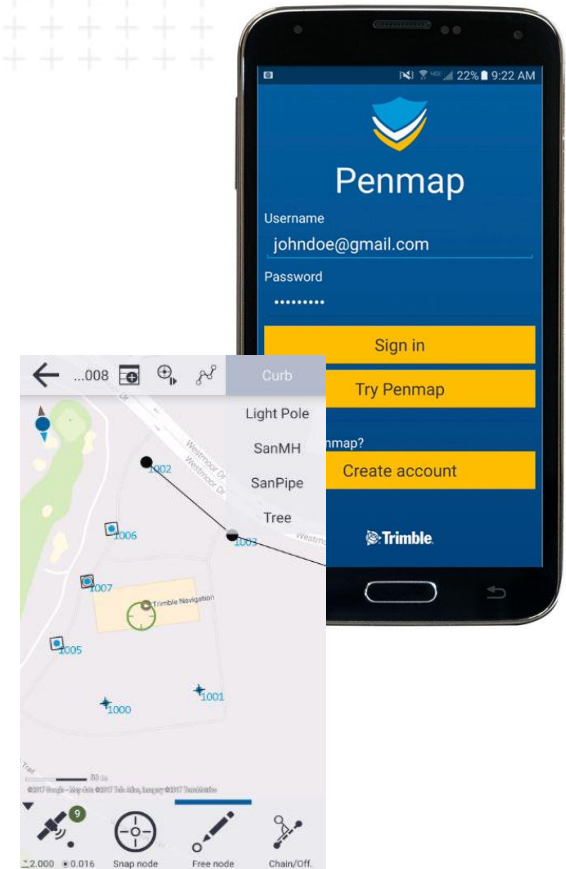

## Select and Edit Object Attributes

# Field Data Capture

## ■ PenMap

- Trimble® Penmap® for Android™ is a powerful, yet incredibly straightforward cloud-connected
- It's designed to do all the basics well, and provide an intuitive and effective interface for entering and managing features and attributes.
- Penmap makes basic cadastral, topo, and other field data collection tasks easy
- Key Features:
  - Core survey functionality and high accuracy GIS data collection
  - Powerful but straightforward operations
  - Intuitive interface using your own Android device
  - Supports Trimble Catalyst software-based GNSS receiver for on-demand precise positioning
  - Compatible with existing Trimble GNSS R-Series receivers

# R1

## ■ Trimble R1

- Small, rugged, lightweight GNSS receiver for great mobility
- Flexibility to choose your data collection device (BYOB)
- Bluetooth connection to Trimble handhelds or consumer-grade smart devices
- Provides higher-accuracy location data (1 – 2m)
- Flexible, professional data collection in more places
- Optional ViewPoint RTX provides sub-meter accuracy via IP or satellite

# R2

## ■ Trimble R2

- Professional solution for GIS & survey applications ranging from submeter to centimeter accuracies
- Easily collect data by pairing with devices such as smartphones, tablets or Trimble handhelds
- Fast to setup, easy-to-use, keeping you productive and focused on your work
- Supports multiple satellite constellations and correction sources for accurate data at any location
- Compact, cable-free design with integrated antenna

OPTRON

# Comparison

GNSS Receivers	R2 GNSS receiver	R1 GNSS receiver	Trimble Catalyst On-Demand Positioning Service
			
DGNSS accuracy postprocessed*	>1 cm	50 cm	N/A
DGNSS accuracy real-time*	>1 cm	<1 m	> 1 cm
GLONASS-capable	Yes	Yes	Yes
EVEREST multipath rejection	Yes	Yes	Yes
GNSS Antenna	Integrated	Integrated	External
RTX compatible	Yes	Yes (Trimble ViewPoint RTX™)	Yes
Integrated SBAS	Yes	Yes	Yes
Integrated OmniSTAR	Yes (VBS, XP, HP, or G2)	No	No
NMEA output	Yes (Optional)	Yes (Non-RTX)	No
RTCM input	Yes	Yes	Yes
Integrated Bluetooth	Yes	Yes	No
Weight	1.08 kg / 2.38 lbs	0.187 kg / 0.4 lbs	N/A
Battery life	5 hours (varies with temperature)	> 10 hours	N/A
Ruggedness	Withstands 2 m (6.6 ft) drop onto concrete	Withstands 1.2 m (4 ft) drop to plywood over concrete	N/A
Environmental	IP65	IP65	N/A
Operating temperature	-20° C to 55° C / -4° F to 131° F	-20° C to 60° C / -4° F to 140° F	N/A

# EM100 GNSS Module

- Add the Trimble® EM100 module to your T7, Nomad 5 or TSC7 to get integrated sub-meter positioning in the field
- Supports RTX (ViewPoint)
